ONE, ARINC and ART partner for Flight Applications

ONE, ARINC, and Alpha Research Technologies (ART) have teamed to offer a rugged, compact, and flight worthy Iridium based communication system utilizing the ONE ONEuP architecture for the U.S. Coast Guard. The team provides the three successful components to satisfying the unique requirements of this type of application – proven software and operating system architecture from ONE, industry renowned aviation integration experience from ARINC, and demonstrated design, development, and production of rugged systems by ART.
